

**SYLVER SKIN
CARE**

"Grace your Glow, Glow with Sylver"

One Serum. Five Steps. Simplified.

Launching a multi-benefit D2C skincare serum that replaces cluttered routines with science-backed simplicity

5-in-1

Routine Consolidation

4 Key

Active Ingredients

All Types

Skin Compatibility

D2C + Retail

Channel Strategy

Modern Skincare is Exhausting

Users are overwhelmed by 5-step routines. They spend more time managing products than seeing results. The question is no longer "what should I use?" — it's "how do I stop using so much?"

Are you tired of...

Cleanser ×

Toner ×

Serum ×

Moisturizer ×

Sunscreen ×

Shelf Overload

Consumers average 6–8 skincare products daily. The average routine costs \$80–200/month and takes 10+ minutes.

Ingredient Confusion

Users don't know which ingredients work together, what order to apply, or if they're overdoing active ingredients.

Subscription Fatigue

Multiple brand subscriptions, conflicting routines, and wasted half-used bottles create frustration and financial waste.

Sylver's opportunity: Be the last product they ever need to add to their routine.

The Overwhelmed Optimiser

Urban · Age 22–38 · Skincare-Aware

- Spends ₹3,000–₹8,000/month on skincare
- Follows beauty influencers & Reddit threads
- Skin-aware but not dermatologist-guided
- Cruelty-free & clean beauty preference
- Wants results with less effort

Goals & Needs

- Visible skin improvements (glow, texture, clarity)
- Routine that fits in under 5 minutes
- Products backed by real science, not just marketing

Pain Points

- Over-buying products that sit half-used on the shelf
- Conflicting ingredient advice from different influencers
- Not seeing results despite spending more and more

Behavioural Signals

- Searches 'simplified skincare routine' and 'is serum enough?'
- Abandons cart when routine seems 'too complicated'
- High loyalty once a product actually delivers results

Introducing Sylver Serum

One multi-benefit serum that replaces five products. Not a compromise — an upgrade.

"For the skincare-aware urban woman who is tired of complicated routines, Sylver is the one serum that delivers brightening, barrier repair, and anti-aging — replacing cleanser prep, toner, actives, moisturiser, and sun protection base — in a single cruelty-free, clinically-backed formula."

Niacinamide

Brightening & pore minimising

10% concentration — clinical grade

Retinol

Anti-aging & cell turnover

Encapsulated for all skin types

Ceramides

Barrier repair & hydration lock

Mimics natural skin lipids

Rare Botanicals

Soothing & antioxidant protection

Sustainably sourced actives

The Sylver D2C Experience

Three digital pillars that support the product — personalisation, transparency, and loyalty.

Skin Quiz & Match

- 3-minute skin type & concern quiz on landing
- Ingredient match score shown per product
- Personalised routine simplification report

Ingredient Transparency

- Full clinical evidence card per ingredient
- Compatibility checker (safe to layer?)
- Real-time skin goal tracker in-app

Subscription + Loyalty

- Subscribe & save model (15–20% off)
- Glow Points loyalty program
- Refillable packaging for sustainability story

Launch in 3 Phases

Phase 1

🕒 Month 1–2

Seed & Build

- Micro-influencer seeding (10K–100K audience)
- Before/after UGC content campaign
- Waitlist + early access landing page
- Dermatologist partnership for credibility

Phase 2

🕒 Month 3–5

Launch & Scale

- D2C website launch + DTC Meta/Instagram ads
- Nykaa / Sephora partnership listing
- PR to beauty editors + earned media
- Paid search targeting competitor keywords

Phase 3

🕒 Month 6+

Retain & Grow

- Subscription model activation
- Loyalty rewards program (Glow Points)
- International D2C expansion (UAE, SEA)
- Product line extension (SPF serum, eye serum)

How We Define Glow-Up

Every metric ladders up to one goal: a user who sees visible results and never goes back to 5 products.

Where Sylver Wins

Brand	Multi-benefit?	Cruelty-Free	Rare Botanicals	D2C First	
✦ Sylver	✓ Yes (5-in-1)	✓ Yes	✓ Unique USP	✓ Yes	
The Ordinary	✗ Single actives	✓ Yes	✗ No	✓ Yes	
Paula's Choice	Partially	✓ Yes	✗ No	✓ Yes	
Minimalist	✗ Single actives	✓ Yes	✗ No	✓ Yes	
Kiehl's / Origins	Partially	✗ Varies	Partially	✗ Retail-first	

Sylver's moat: the only cruelty-free, multi-benefit, botanically-powered serum built for D2C-first distribution.

The Sylver Thesis

"The skincare market is drowning in complexity. Sylver wins not by adding more, but by being the confident last step — one bottle that earns permanent shelf space by actually delivering."

01

Problem is real: skincare overload drives churn and category fatigue, especially among 22-38 urban users

02

Formula is differentiated: 4-active stack (Niacinamide + Retinol + Ceramides + Botanicals) is clinically compelling

03

GTM is sequenced: influencer seeding → D2C launch → retail expand → subscription flywheel

04

Metrics focus on retention: repeat purchase rate and routine simplification rate are the true north stars
